GRADUATED SERIES OF PENS.

The new feature in this Series is the production of a number of carefully-selected patterns, each in different grades of flexibility, and to make these grades easily distinguishable by *embossed letters*, H.H. standing for Extra-hard, H. for Hard, S. for Soft or Flexible, and S.S. for Extra-soft.

The *stamped letters* E.F., F., M., B., and B.B., signify, as hitherto, Extra-fine, Fine, Medium, Broad, and Extra-broad points.

Number of Pen.	Name or Description of Pen.	Colour.	Price per Gross.	Contents of 6d. boxes at 4/- per dozen.
1	 Office Pen—in E.F., F., and M. points	Carbonized	1/2	3 dozen

HAND-MADE PAPER PENS.

Specially constructed, with somewhat Broad but perfectly Circular Points, to suit the Hand-made and other Rough Papers so much in use of late, without producing the thick lines of the ordinary broad-pointed pens generally used for that purpose.

The Series contains various degrees of flexibility, and each pattern is made in two widths of point (**B** and **BB**), to suit all hands.

In ordering, be particular to name the width of point you require.

PATENT ANTI-BLOTTING PENS.

PATENTED IN AMERICA, AUSTRIA, ENGLAND, FRANCE, GERMANY, HUNGARY.

C. B. & Co., Ltd., call the attention of the public to this novel and useful pen.

The annoyance caused by a pen dropping the ink whilst taking it from the inkpot to the writing-paper, and even after beginning to write, has been felt by most people. The construction of this pen prevents the dropping of the ink (if the pen is not shaken purposely) and does away with this annoyance. The peculiar formation of the point also gives the pen something of the goose-quill action so much admired by some writers, and also acts to some extent as a reservoir pen.

These pens are made in various forms and different-sized points, to suit most hands.
